**Remote Android Developer | Kotlin | Jetpack Compose | Agile | CI/CD | Stamp 4 (Ireland)**

---

## Profile Summary

Experienced **Android Engineer** with over **10 years** of building high-quality, scalable, and client-facing mobile applications using **Kotlin** and **Jetpack Compose**.

Currently leading **internationalization** efforts at **Toast** for their global POS platform, with strong exposure to **modular UI design**, **CI/CD pipelines**, and **Agile** delivery models. Proven experience collaborating with stakeholders, designers, QA, and DevOps across distributed teams.

Previously built and delivered production-grade Android SDKs and enterprise solutions at **Mastercard** and **SAP**.

Based in Dublin with **full working rights in Ireland (Stamp 4)**.

---

## Professional Experience

### **Toast – Senior Android Engineer (Contract)**

**May 2024 – Present**

- Leading **internationalization** for Toast's Android POS platform used by restaurants worldwide.
- Collaborate closely with design, QA, product managers, and platform teams to deliver localized user experiences.
- Built **modular Jetpack Compose UI components** while migrating legacy XML.
- Support **CI/CD workflows** via **GitHub Actions** and automated testing.
- Remote-first team collaboration using Jira and Figma.
- **Tech:** Kotlin, Jetpack Compose, Coroutines, GraphQL, GitHub Actions, Material 3

### **Mastercard – Senior Android Engineer**

**Feb 2021 – May 2024**

- Delivered **Android SDKs** and consumer apps in the fintech domain, collaborating across Agile squads.

- Advocated **test-driven development (TDD)** and improved CI pipelines to reduce release friction.
- Mentored peers and led **Kotlin modernization** initiatives.
- **Tech:** Kotlin, Jetpack Compose, Firebase, Jenkins, REST APIs, Jira, Confluence

## SAP – Mobile UX Engineer

Jan 2018 – Feb 2021

- Built enterprise healthcare mobile apps with **BLE** and **WearOS** integrations.
- Worked directly with clients to advise on architecture and deliver production-ready Android features.
- Balanced remote client support with iterative sprint delivery in global teams.
- **Tech:** Kotlin, Android Jetpack, BLE, REST, Agile, Jira

## Nitor Infotech – Android Developer

Jun 2014 – Jun 2016

- Developed Android apps for B2B clients across fintech and healthcare.
- Introduced modular structures and built robust REST integrations.
- Worked in agile sprints with QA/test teams to deliver quality builds on time.

---
